**ADVISORY
SERVICES**

GoSecure **YOUR TRUSTED ADVISOR**

GoSecure is a recognized cybersecurity leader and innovator, pioneering the integration of endpoint, network, and email threat detection into a single Managed Detection and Response service. For over 10 years, GoSecure has been helping customers better understand their security gaps and improve their organizational risk and security maturity through MDR and Advisory Services solutions delivered by one of the most trusted, skilled and experienced teams in the industry.

GoSecure **ADVISORY SERVICES**

Optimize Cybersecurity Programs

The threat landscape changes every day. Attacks, such as ransomware, are on the rise. Preparation is the key to protecting the people, technology and data of an organization. So, how can organizations know if they are PREPARED to protect against a breach or respond to an attack if needed?

GoSecure offers a comprehensive set of end-to-end solutions to help organizations evaluate cybersecurity maturity, risks and gaps. The experts at GoSecure can assess existing technologies and collaborate with in-house resources to ensure that insights are actionable and practical - while delivering real-world solutions that enhance security posture.

GoSecure Breach Readiness Services | Prepare for Cyberattacks

GoSecure Breach Readiness Services test and sharpen incident response capabilities and prepare organizations to respond when a breach happens.

- The **GoSecure Breach Readiness Assessment (BRA)** offers a comprehensive evaluation of incident preparedness from business continuity to incident response and through disaster recovery, ensuring that the people, processes, tools and policies are ready when a breach happens.
- **GoSecure Tabletop Exercises** are custom-designed, real-world exercises that test tools, processes, policies and people with emphasis on group problem-solving under pressure. Communications, documentation and cross-functional engagement are also evaluated throughout the exercise.

GoSecure Cybersecurity Assessment | Determine Your Security Maturity

Gain a comprehensive understanding of security posture, risks and gaps with a **GoSecure Cybersecurity Assessment (CSA)** providing actionable insights into cybersecurity maturity and delivering practical recommendations based on the type of organization—size, industry, etc. Choose from two packages.

- The **CSA Enterprise** includes several phases that assess the critical aspects of your technology, environments, policies and procedures, targeted to deliver overall security improvements.
- The **CSA Essentials** package is streamlined and highly focused, designed to provide the most important insights that can drive security roadmaps and improvements that address the biggest risks and issues based on the industry associated with an organization.

GoSecure Incident Response Services | Respond and Recover Faster

A cyberattack can happen to an organization at any time. GoSecure Incident Response programs prepare organizations to contain, resolve and recover from breaches faster, minimizing operational, financial and reputational impact. GoSecure offers both year-long retainer programs and emergency incident response support services that come with recovery guidance and dark web monitoring from expert threat hunters.

- **GoSecure Incident Response Retainer (IRR)** - When a breach happens, organizations with a GoSecure Incident Response Retainer have access to experienced professionals to help quickly contain and address the issue, knowing that the systems, processes and people are already in place to respond.
- **Emergency Incident Response (IR) Services** - The Incident Response team can provide Emergency Services with a short-term engagement offering access to experienced professionals who can help navigate through emergent incidents including malware and ransomware attacks.

GoSecure Penetration Testing Services | Test Your Defenses

Rely on **Penetration Testing from GoSecure** to help identify the impact attackers can have on an organization. The Offensive Security Certified Professional (OSCP) team at GoSecure will design a program based on the threat model, including industry and technology stack of an organization. GoSecure delivers programs that will identify where and how adversaries can target an organization, including internal and external networks, web applications, mobile apps & devices, Wi-Fi, endpoints, physical security and phishing attacks. GoSecure can also assist with code review and embedded device/industrial testing.

GoSecure Red & Purple Team Services | Improve Your Defenses

Red Team and Purple Team services can help deliver improved security posture, enhanced cybersecurity defenses and a better prepared team - ready to respond to real-world attacks.

- **GoSecure Red Team** strategic engagements combine multiple available attack techniques with experienced security professionals to test the in-house reaction and detection capabilities at an organization.
- **GoSecure Purple Team** strategic engagements take a 'test, fix, test again, repeat' approach to rapidly improve security posture for organizations through a long-term, collaborative engagement with in-house teams.

GoSecure Privacy & Compliance Services | Protect Sensitive Data

GoSecure helps organizations navigate the complicated global regulatory landscape and supports organizations that store, process and transmit personal information.

- **GoSecure Privacy Consulting Services** experts have global experience which they apply to ensure privacy programs deliver complete solutions to ensure personal information is safe and organizations are prepared to protect against data breaches.
- **GoSecure Payment Card Industry Data Security Standard (PCI DSS)** services are available for organizations who need help with the Self-Assessment Questionnaire (SAQ) and in Canada, GoSecure is a Qualified Security Assessor who can conduct a full assessment, resulting in a Report on Compliance (ROC).

GoSecure Security Compromise Assessment | Find the Threats

A **GoSecure Security Compromise Assessment (SCA)** can help find the hidden threats that automation alone may not detect. The SCA combines 60 days of GoSecure Titan Managed Detection and Response (MDR) with skilled, experienced human threat hunting, which delivers an edge over pure automation that can find threats to sensitive data that could potentially compromise current or future operations. The SCA can identify potential risks to your networks, endpoints & more.
