

GOSECURE TITAN® MXDR MANAGED EXTENDED DETECTION & RESPONSE

Improve Your Productivity While We Focus On Your Security

A FOUNDATION YOU CAN TRUST & BUILD UPON

GoSecure Titan Managed Extended Detection & Response (MXDR) identifies, blocks & reports potential breaches, often before the organization is even aware there is an issue – backed by the experienced threat hunters in the GoSecure Active Response Center (ARC) who respond swiftly to help remediate issues.

IDENTIFY

Find threats across endpoints, networks, email and the web through automated monitoring and human threat hunting. Identifies sophisticated potential attacks like hidden malware and negligent/ malicious insiders.

MITIGATE

Get best-in-class detection to response time of 15 minutes, with the GoSecure Active Response Center (ARC) delivering swift mitigation for managed clients to stop threats before they spread.

RESPOND

GoSecure ARC professionals become an extension of the in-house security team, handling threat responses as specified by the custom playbook – 24/7, 365 days a year.

THE GOSECURE TITAN MXDR ADVANTAGE

- GoSecure Titan MXDR identifies, blocks and reports potential breaches, often before the organization is even aware there is an issue.
- GoSecure blends automation with expert-level human analysis to provide an advantage over other tools and services, resulting in fewer false positives.
- Continuous 24/7 automated monitoring and human-managed support protect organizations around the clock – because breaches can happen at any time.
- The GoSecure Titan MXDR Portal centralizes client security health data – delivering easy-to-understand charts and graphs for network, endpoint and event data – and ticketing, into a single pane of glass.
- GoSecure Titan Endpoint Detection & Response (EDR) and GoSecure Titan Next Generation Antivirus (NGAV) are included with every MXDR package protecting organizations and users at any location – 24/7, 365 days a year.
- Available GoSecure Titan Inbox Detection & Response (IDR) offers industry-leading anti-phishing capabilities at the user-level.

COMPREHENSIVE COVERAGE

GoSecure Titan® Managed Extended Detection & Response (MXDR) services combine endpoint, network, and email threat detection into a single managed extended detection & response service delivering rapid response and active mitigation services that directly touches customers endpoints and networks with both automated monitoring tools and human threat hunting capabilities.

Comprehensive coverage is vital according to GoSecure client law firm McInnes Cooper. *"The same protection we had for our brick-and-mortar buildings, protecting our internet, was now protecting all of our devices - no matter where they went. GoSecure was one of the first we found providing that type of a solution."*

- Scott Howell, Managing Director of Technology and Information Services.

A MAJOR PLAYER IN MXDR

GoSecure was designated a Major Player in the IDC 2021 Managed Detection & Response Marketscape Report. This multi-dimensional review recognized the platform's flexibility, tailored client playbooks, integrated anti-phishing options and emergency services capabilities.

FLEXIBLE BUNDLES FOR EVERY ORGANIZATION

GoSecure Titan MXDR is designed to maximize a client's security investments by leveraging SIEM and SOAR backend technologies to integrate and analyze security data. GoSecure's MXDR service enhances flexibility and integration by ingesting market-leading EDRs (including Check Point EDR, MS Defender and GoSecure EDR) as well as Windows Events including Sysmon, Firewall logs and NGAV logs.

Our pre-packaged MXDR bundles are built upon the GoSecure Titan MXDR | Foundation offering – which includes the comprehensive baseline set of cybersecurity technologies required to support, implement and manage a true MXDR solution and is designed to support best-of-breed options across various elements of the configuration.
